

Danida Green Business Partnerships – Thematic Priorities

2024 Application Window

This document provides an overview of the strategic and thematic priorities of the Embassies in countries which are eligible to submit applications under the DGBP programme. It is the ambition that DGBP applicants align their projects with these priorities as much as possible.

This alignment will not be scored directly but will be taken into consideration during review of the applications.

For countries not listed here, no specific thematic priorities are provided. We refer to the general Danish priorities as guidelines for these countries.

Bangladesh:	
Thematic areas	Embassy interest
Sustainable food production, agriculture, fisheries and other natural-resource management	
Prevention of food loss and food waste	X
Climate-smart agriculture and sustainable food systems	X
Promote agro-organic cultivation methods	X
Eco friendly alternative crops	X
Climate resilient crops	X
Sustainable forest management	
Food production and other production that reduces the pressure on ecosystems and enhances biodiversity	X
Sustainable management of sea resources	
Sustainable forest management	X
Reduction of desertification and land degradation	X
Protection of water bodies and other	X
Natural resources management and production that preserves biodiversity and restores ecosystems	X
Responsible aquaculture	X
Promoting ecosystem management & restoration for improved livelihoods	X
Production and consumption (circular economy)	
Technologies and business models for increased resource productivity	X
Sustainable tourism	
Measures to suppress or reduce pollution in land, water and air	X
Cleaner production processes	X
Sustainable transport systems	X
Reducing the carbon footprint of value chains and rural producers	X
Optimal use of residual agricultural, industrial and municipal waste	X
Energy services	
Increased energy efficiency	X
Renewable energy production and use	X
Water services	
Sustainable water resources management	X
Sustainable waste water management and reuse	X
Climate smart water infrastructure for supply and sanitation	X
Enabling business models and technologies	
Climate finance	X
Information systems and technologies	X
Other thematic areas:	

Brazil:	
Thematic areas	Embassy interest
Sustainable food production, agriculture, fisheries and other natural-resource management	
Prevention of food loss and food waste	X
Climate-smart agriculture and sustainable food systems	X
Promote agro-organic cultivation methods	X
Eco friendly alternative crops	X
Climate resilient crops	
Sustainable forest management	X
Food production and other production that reduces the pressure on ecosystems and enhances biodiversity	X
Sustainable management of sea resources	
Sustainable forest management	X
Reduction of desertification and land degradation	
Protection of water bodies and other	
Natural resources management and production that preserves biodiversity and restores ecosystems	X
Responsible aquaculture	
Promoting ecosystem management & restoration for improved livelihoods	X
Production and consumption (circular economy)	
Technologies and business models for increased resource productivity	
Sustainable tourism	
Measures to suppress or reduce pollution in land, water and air	
Cleaner production processes	
Sustainable transport systems	
Reducing the carbon footprint of value chains and rural producers	X
Optimal use of residual agricultural, industrial and municipal waste	X
Energy services	
Increased energy efficiency	X
Renewable energy production and use	X
Water services	
Sustainable water resources management	
Sustainable waste water management and reuse	X
Climate smart water infrastructure for supply and sanitation	
Enabling business models and technologies	
Climate finance	X
Information systems and technologies	X
Other thematic areas:	

Burkina Faso:	
Thematic areas	Embassy interest
Sustainable food production, agriculture, fisheries and other natural-resource management	
Prevention of food loss and food waste	
Climate-smart agriculture and sustainable food systems	X
Promote agro-organic cultivation methods	X ¹
Eco friendly alternative crops	
Climate resilient crops	X
Sustainable forest management	
Food production and other production that reduces the pressure on ecosystems and enhances biodiversity	X ²
Sustainable management of sea resources	
Sustainable forest management	
Reduction of desertification and land degradation	X
Protection of water bodies and other	X
Natural resources management and production that preserves biodiversity and restores ecosystems	X ³
Responsible aquaculture	
Promoting ecosystem management & restoration for improved livelihoods	
Production and consumption (circular economy)	
Technologies and business models for increased resource productivity	
Sustainable tourism	
Measures to suppress or reduce pollution in land, water and air	
Cleaner production processes	
Sustainable transport systems	
Reducing the carbon footprint of value chains and rural producers	
Optimal use of residual agricultural, industrial and municipal waste	X
Energy services	
Increased energy efficiency	
Renewable energy production and use	X
Water services	
Sustainable water resources management	X
Sustainable waste water management and reuse	X
Climate smart water infrastructure for supply and sanitation	X
Enabling business models and technologies	
Climate finance	X
Information systems and technologies	X
Other thematic areas:	

¹ For climate resilience

² As co-benefit of other interests like climate resilience

³ As co-benefit of other interests like climate resilience

Colombia:	
Thematic areas	Embassy interest
Sustainable food production, agriculture, fisheries and other natural-resource management	
Prevention of food loss and food waste	X
Climate-smart agriculture and sustainable food systems	X
Promote agro-organic cultivation methods	
Eco friendly alternative crops	
Climate resilient crops	
Sustainable forest management	X
Food production and other production that reduces the pressure on ecosystems and enhances biodiversity	
Sustainable management of sea resources	
Sustainable forest management	
Reduction of desertification and land degradation	
Protection of water bodies and other	
Natural resources management and production that preserves biodiversity and restores ecosystems	
Responsible aquaculture	X
Promoting ecosystem management & restoration for improved livelihoods	
Production and consumption (circular economy)	
Technologies and business models for increased resource productivity	X
Sustainable tourism	
Measures to suppress or reduce pollution in land, water and air	
Cleaner production processes	
Sustainable transport systems	X
Reducing the carbon footprint of value chains and rural producers	X
Optimal use of residual agricultural, industrial and municipal waste	X
Energy services	
Increased energy efficiency	X
Renewable energy production and use	X
Water services	
Sustainable water resources management	
Sustainable waste water management and reuse	X
Climate smart water infrastructure for supply and sanitation	X
Enabling business models and technologies	
Climate finance	X
Information systems and technologies	X
Other thematic areas:	
Digitization, emphasising areas like sustainability, connectivity (rural areas), e-learning, e-health, e-governance which all is an enabler for higher standard of living	

Egypt:	
Thematic areas	Embassy interest
Sustainable food production, agriculture, fisheries and other natural-resource management	
Prevention of food loss and food waste	X
Climate-smart agriculture and sustainable food systems	
Promote agro-organic cultivation methods	
Eco friendly alternative crops	
Climate resilient crops	X
Sustainable forest management	
Food production and other production that reduces the pressure on ecosystems and enhances biodiversity	
Sustainable management of sea resources	
Sustainable forest management	
Reduction of desertification and land degradation	X
Protection of water bodies and other	X
Natural resources management and production that preserves biodiversity and restores ecosystems	
Responsible aquaculture	X
Promoting ecosystem management & restoration for improved livelihoods	
Production and consumption (circular economy)	
Technologies and business models for increased resource productivity	
Sustainable tourism	
Measures to suppress or reduce pollution in land, water and air	X
Cleaner production processes	
Sustainable transport systems	X
Reducing the carbon footprint of value chains and rural producers	X
Optimal use of residual agricultural, industrial and municipal waste	X
Energy services	
Increased energy efficiency	X
Renewable energy production and use	X
Water services	
Sustainable water resources management	X
Sustainable waste water management and reuse	X
Climate smart water infrastructure for supply and sanitation	
Enabling business models and technologies	
Climate finance	X
Information systems and technologies	
Other thematic areas:	

Ethiopia:	
Thematic areas	Embassy interest
Sustainable food production, agriculture, fisheries and other natural-resource management	
Prevention of food loss and food waste	X
Climate-smart agriculture and sustainable food systems	X
Promote agro-organic cultivation methods	X
Eco friendly alternative crops	X
Climate resilient crops	X
Sustainable forest management	X
Food production and other production that reduces the pressure on ecosystems and enhances biodiversity	X
Sustainable management of sea resources	
Sustainable forest management	X
Reduction of desertification and land degradation	X
Protection of water bodies and other	X
Natural resources management and production that preserves biodiversity and restores ecosystems	X
Responsible aquaculture	
Promoting ecosystem management & restoration for improved livelihoods	X
Production and consumption (circular economy)	
Technologies and business models for increased resource productivity	X
Sustainable tourism	
Measures to suppress or reduce pollution in land, water and air	X
Cleaner production processes	X
Sustainable transport systems	
Reducing the carbon footprint of value chains and rural producers	X
Optimal use of residual agricultural, industrial and municipal waste	X
Energy services	
Increased energy efficiency	X
Renewable energy production and use	X
Water services	
Sustainable water resources management	X
Sustainable waste water management and reuse	X
Climate smart water infrastructure for supply and sanitation	X
Enabling business models and technologies	
Climate finance	X
Information systems and technologies	X
Other thematic areas:	
Climate insurances, Cold-chains and Irrigation	

Georgia:	
Thematic areas	Embassy interest
Sustainable food production, agriculture, fisheries and other natural-resource management	
Prevention of food loss and food waste	
Climate-smart agriculture and sustainable food systems	X
Promote agro-organic cultivation methods	X
Eco friendly alternative crops	
Climate resilient crops	
Sustainable forest management	X
Food production and other production that reduces the pressure on ecosystems and enhances biodiversity	
Sustainable management of sea resources	
Sustainable forest management	X
Reduction of desertification and land degradation	
Protection of water bodies and other	
Natural resources management and production that preserves biodiversity and restores ecosystems	
Responsible aquaculture	
Promoting ecosystem management & restoration for improved livelihoods	
Production and consumption (circular economy)	
Technologies and business models for increased resource productivity	X
Sustainable tourism	X
Measures to suppress or reduce pollution in land, water and air	
Cleaner production processes	
Sustainable transport systems	X
Reducing the carbon footprint of value chains and rural producers	
Optimal use of residual agricultural, industrial and municipal waste	X
Energy services	
Increased energy efficiency	X
Renewable energy production and use	X
Water services	
Sustainable water resources management	X
Sustainable waste water management and reuse	
Climate smart water infrastructure for supply and sanitation	
Enabling business models and technologies	
Climate finance	X
Information systems and technologies	X
Other thematic areas:	

Ghana:	
Thematic areas	Embassy interest
Sustainable food production, agriculture, fisheries and other natural-resource management	
Prevention of food loss and food waste	X
Climate-smart agriculture and sustainable food systems	X
Promote agro-organic cultivation methods	X
Eco friendly alternative crops	X
Climate resilient crops	X
Sustainable forest management	X
Food production and other production that reduces the pressure on ecosystems and enhances biodiversity	X
Sustainable management of sea resources	
Sustainable forest management	X
Reduction of desertification and land degradation	X
Protection of water bodies and other	X
Natural resources management and production that preserves biodiversity and restores ecosystems	X
Responsible aquaculture	X
Promoting ecosystem management & restoration for improved livelihoods	
Production and consumption (circular economy)	
Technologies and business models for increased resource productivity	X
Sustainable tourism	
Measures to suppress or reduce pollution in land, water and air	X
Cleaner production processes	X
Sustainable transport systems	X
Reducing the carbon footprint of value chains and rural producers	
Optimal use of residual agricultural, industrial and municipal waste	X
Energy services	
Increased energy efficiency	X
Renewable energy production and use	X ⁴
Water services	
Sustainable water resources management	X
Sustainable waste water management and reuse	X
Climate smart water infrastructure for supply and sanitation	X
Enabling business models and technologies	
Climate finance	X
Information systems and technologies	X
Other thematic areas:	
Fintech for inclusive economic growth	X

⁴ Specifically small-scale systems/off-grid/last mile

India:	
Thematic areas	Embassy interest
Sustainable food production, agriculture, fisheries and other natural-resource management	
Prevention of food loss and food waste	X
Climate-smart agriculture and sustainable food systems	X
Promote agro-organic cultivation methods	
Eco friendly alternative crops	
Climate resilient crops	X
Sustainable forest management	
Food production and other production that reduces the pressure on ecosystems and enhances biodiversity	X
Sustainable management of sea resources	
Sustainable forest management	
Reduction of desertification and land degradation	
Protection of water bodies and other	
Natural resources management and production that preserves biodiversity and restores ecosystems	X
Responsible aquaculture	X
Promoting ecosystem management & restoration for improved livelihoods	X
Production and consumption (circular economy)	
Technologies and business models for increased resource productivity	X
Sustainable tourism	
Measures to suppress or reduce pollution in land, water and air	X
Cleaner production processes	X
Sustainable transport systems	
Reducing the carbon footprint of value chains and rural producers	
Optimal use of residual agricultural, industrial and municipal waste	X
Energy services	
Increased energy efficiency	X
Renewable energy production and use	X
Water services	
Sustainable water resources management	X
Sustainable waste water management and reuse	X
Climate smart water infrastructure for supply and sanitation	X
Enabling business models and technologies	
Climate finance	X
Information systems and technologies	X
Other thematic areas:	
Green Hydrogen and green Fuels, biomass and biogas, green shipping, efficient dairy production	X

Indonesia:	
Thematic areas	Embassy interest
Sustainable food production, agriculture, fisheries and other natural-resource management	X
Prevention of food loss and food waste	X
Climate-smart agriculture and sustainable food systems	X
Promote agro-organic cultivation methods	X
Eco friendly alternative crops	X
Climate resilient crops	X
Sustainable forest management	
Food production and other production that reduces the pressure on ecosystems and enhances biodiversity	X
Sustainable management of sea resources	X
Sustainable forest management	X
Reduction of desertification and land degradation	
Protection of water bodies and other	
Natural resources management and production that preserves biodiversity and restores ecosystems	X
Responsible aquaculture	X
Promoting ecosystem management & restoration for improved livelihoods	X
Production and consumption (circular economy)	X
Technologies and business models for increased resource productivity	X
Sustainable tourism	
Measures to suppress or reduce pollution in land, water and air	X
Cleaner production processes	X
Sustainable transport systems	X
Reducing the carbon footprint of value chains and rural producers	
Optimal use of residual agricultural, industrial and municipal waste	X
Energy services	X
Increased energy efficiency	X
Renewable energy production and use	X
Water services	
Sustainable water resources management	
Sustainable waste water management and reuse	
Climate smart water infrastructure for supply and sanitation	
Enabling business models and technologies	
Climate finance	X
Information systems and technologies	X
Other thematic areas:	

Kenya:	
Thematic areas	Embassy interest
Sustainable food production, agriculture, fisheries and other natural-resource management	
Prevention of food loss and food waste	X
Climate-smart agriculture and sustainable food systems	X
Promote agro-organic cultivation methods	X
Eco friendly alternative crops	X
Climate resilient crops	X
Sustainable forest management	X
Food production and other production that reduces the pressure on ecosystems and enhances biodiversity	X
Sustainable management of sea resources	
Sustainable forest management	X
Reduction of desertification and land degradation	X
Protection of water bodies and other	X
Natural resources management and production that preserves biodiversity and restores ecosystems	X
Responsible aquaculture	X
Promoting ecosystem management & restoration for improved livelihoods	X
Production and consumption (circular economy)	
Technologies and business models for increased resource productivity	X
Sustainable tourism	X
Measures to suppress or reduce pollution in land, water and air	X
Cleaner production processes	X
Sustainable transport systems	X
Reducing the carbon footprint of value chains and rural producers	X
Optimal use of residual agricultural, industrial and municipal waste	X
Energy services	
Increased energy efficiency	X
Renewable energy production and use	X
Water services	
Sustainable water resources management	X
Sustainable waste water management and reuse	X
Climate smart water infrastructure for supply and sanitation	X
Enabling business models and technologies	
Climate finance	X
Information systems and technologies	X
Other thematic areas:	

Mali:	
Thematic areas	Embassy interest
Sustainable food production, agriculture, fisheries and other natural-resource management	
Prevention of food loss and food waste	X
Climate-smart agriculture and sustainable food systems	X
Promote agro-organic cultivation methods	X
Eco friendly alternative crops	X
Climate resilient crops	X
Sustainable forest management	X
Food production and other production that reduces the pressure on ecosystems and enhances biodiversity	X
Sustainable management of sea resources	
Sustainable forest management	X
Reduction of desertification and land degradation	X
Protection of water bodies and other	X
Natural resources management and production that preserves biodiversity and restores ecosystems	X
Responsible aquaculture	
Promoting ecosystem management & restoration for improved livelihoods	X
Production and consumption (circular economy)	
Technologies and business models for increased resource productivity	X
Sustainable tourism	
Measures to suppress or reduce pollution in land, water and air	X
Cleaner production processes	X
Sustainable transport systems	
Reducing the carbon footprint of value chains and rural producers	X
Optimal use of residual agricultural, industrial and municipal waste	X
Energy services	
Increased energy efficiency	X
Renewable energy production and use	X
Water services	
Sustainable water resources management	X
Sustainable waste water management and reuse	X
Climate smart water infrastructure for supply and sanitation	X
Enabling business models and technologies	
Climate finance	X
Information systems and technologies	X
Other thematic areas:	
Green job opportunities for youth and marginalized groups	

Mexico:	
Thematic areas	Embassy interest
Sustainable food production, agriculture, fisheries and other natural-resource management	
Prevention of food loss and food waste	X
Climate-smart agriculture and sustainable food systems	
Promote agro-organic cultivation methods	
Eco friendly alternative crops	
Climate resilient crops	
Sustainable forest management	
Food production and other production that reduces the pressure on ecosystems and enhances biodiversity	
Sustainable management of sea resources	
Sustainable forest management	
Reduction of desertification and land degradation	
Protection of water bodies and other	
Natural resources management and production that preserves biodiversity and restores ecosystems	
Responsible aquaculture	
Promoting ecosystem management & restoration for improved livelihoods	
Production and consumption (circular economy)	
Technologies and business models for increased resource productivity	
Sustainable tourism	
Measures to suppress or reduce pollution in land, water and air	X
Cleaner production processes	X
Sustainable transport systems	
Reducing the carbon footprint of value chains and rural producers	
Optimal use of residual agricultural, industrial and municipal waste	X
Energy services	
Increased energy efficiency	X
Renewable energy production and use	X ⁵
Water services	
Sustainable water resources management	X
Sustainable waste water management and reuse	X
Climate smart water infrastructure for supply and sanitation	X
Enabling business models and technologies	
Climate finance	
Information systems and technologies	X
Other thematic areas:	

⁵ As policy permitting

Morocco:	
Thematic areas	Embassy interest
Sustainable food production, agriculture, fisheries and other natural-resource management	
Prevention of food loss and food waste	X
Climate-smart agriculture and sustainable food systems	X
Promote agro-organic cultivation methods	
Eco friendly alternative crops	
Climate resilient crops	
Sustainable forest management	
Food production and other production that reduces the pressure on ecosystems and enhances biodiversity	X
Sustainable management of sea resources	
Sustainable forest management	
Reduction of desertification and land degradation	X
Protection of water bodies and other	X
Natural resources management and production that preserves biodiversity and restores ecosystems	X
Responsible aquaculture	
Promoting ecosystem management & restoration for improved livelihoods	X
Production and consumption (circular economy)	
Technologies and business models for increased resource productivity	X
Sustainable tourism	X
Measures to suppress or reduce pollution in land, water and air	X
Cleaner production processes	X
Sustainable transport systems	X
Reducing the carbon footprint of value chains and rural producers	
Optimal use of residual agricultural, industrial and municipal waste	X
Energy services	
Increased energy efficiency	X
Renewable energy production and use	X
Water services	
Sustainable water resources management	X
Sustainable waste water management and reuse	X
Climate smart water infrastructure for supply and sanitation	X
Enabling business models and technologies	
Climate finance	X
Information systems and technologies	X
Other thematic areas:	
Green purchase (Grønne indkøb til amb)	

Niger:	
Thematic areas	Embassy interest
Sustainable food production, agriculture, fisheries and other natural-resource management	
Prevention of food loss and food waste	
Climate-smart agriculture and sustainable food systems	X
Promote agro-organic cultivation methods	X
Eco friendly alternative crops	X
Climate resilient crops	X
Sustainable forest management	
Food production and other production that reduces the pressure on ecosystems and enhances biodiversity	
Sustainable management of sea resources	
Sustainable forest management	
Reduction of desertification and land degradation	X
Protection of water bodies and other	X
Natural resources management and production that preserves biodiversity and restores ecosystems	
Responsible aquaculture	
Promoting ecosystem management & restoration for improved livelihoods	
Production and consumption (circular economy)	
Technologies and business models for increased resource productivity	
Sustainable tourism	
Measures to suppress or reduce pollution in land, water and air	
Cleaner production processes	
Sustainable transport systems	
Reducing the carbon footprint of value chains and rural producers	
Optimal use of residual agricultural, industrial and municipal waste	
Energy services	
Increased energy efficiency	
Renewable energy production and use	X
Water services	
Sustainable water resources management	X
Sustainable waste water management and reuse	X
Climate smart water infrastructure for supply and sanitation	X
Enabling business models and technologies	
Climate finance	X
Information systems and technologies	X
Other thematic areas:	
Climate insurance	X

Nigeria:	
Thematic areas	Embassy interest
Sustainable food production, agriculture, fisheries and other natural-resource management	
Prevention of food loss and food waste	X
Climate-smart agriculture and sustainable food systems	X
Promote agro-organic cultivation methods	X
Eco friendly alternative crops	X
Climate resilient crops	X
Sustainable forest management	
Food production and other production that reduces the pressure on ecosystems and enhances biodiversity	X
Sustainable management of sea resources	
Sustainable forest management	
Reduction of desertification and land degradation	X
Protection of water bodies and other	X
Natural resources management and production that preserves biodiversity and restores ecosystems	X
Responsible aquaculture	X
Promoting ecosystem management & restoration for improved livelihoods	X
Production and consumption (circular economy)	
Technologies and business models for increased resource productivity	X
Sustainable tourism	
Measures to suppress or reduce pollution in land, water and air	X
Cleaner production processes	X
Sustainable transport systems	X
Reducing the carbon footprint of value chains and rural producers	X
Optimal use of residual agricultural, industrial and municipal waste	X
Energy services	
Increased energy efficiency	X
Renewable energy production and use	X
Water services	
Sustainable water resources management	X
Sustainable waste water management and reuse	X
Climate smart water infrastructure for supply and sanitation	X
Enabling business models and technologies	
Climate finance	X
Information systems and technologies	X
Other thematic areas:	

Pakistan:	
Thematic areas	Embassy interest
Sustainable food production, agriculture, fisheries and other natural-resource management	
Prevention of food loss and food waste	X
Climate-smart agriculture and sustainable food systems	X
Promote agro-organic cultivation methods	
Eco friendly alternative crops	
Climate resilient crops	
Sustainable forest management	
Food production and other production that reduces the pressure on ecosystems and enhances biodiversity	X
Sustainable management of sea resources	
Sustainable forest management	
Reduction of desertification and land degradation	
Protection of water bodies and other	
Natural resources management and production that preserves biodiversity and restores ecosystems	
Responsible aquaculture	
Promoting ecosystem management & restoration for improved livelihoods	
Production and consumption (circular economy)	
Technologies and business models for increased resource productivity	
Sustainable tourism	
Measures to suppress or reduce pollution in land, water and air	X
Cleaner production processes	
Sustainable transport systems	X
Reducing the carbon footprint of value chains and rural producers	
Optimal use of residual agricultural, industrial and municipal waste	X
Energy services	
Increased energy efficiency	X
